

RADHIKA MAHAJAN

ARCHITECTS

SOCIAL MEDIA VISUAL GUIDELINES

A visual operating system built from the approved RDA identity brief

The source of truth

This guideline translates the approved RDA identity brief into a practical social-media system.

APPROVED BRAND FOUNDATION

FORM × SPACE × DETAIL

DESIGNING SPACES.
CREATING EXPERIENCES.

Architecture + Interior Design
Thoughtful spaces. Balanced decisions.
A clear, refined and individual point of view.

SOCIAL MEDIA TRANSLATION

01 SPACE

Let architecture and interiors remain the hero.

02 THINKING

Explain the decision behind the design.

03 DETAIL

Use material, proportion and craft as content.

04 SYSTEM

Keep colour, type, grid and spacing consistent.

KEY RULE

The social feed should feel authored by RMA,
not assembled from unrelated templates.

Brand foundation

Every social post should reinforce the same perception of the practice.

WHO WE ARE

An architecture and interior design studio focused on thoughtful spaces, balancing aesthetics, functionality and individuality.

WHAT WE STAND FOR

A complete spatial experience — from architectural planning and interior design to carefully considered furniture and turnkey solutions.

WHAT WE COMMUNICATE

The work, the thinking behind the work, material choices, spatial details, process and the people who shape the practice.

**WHAT WE SHOULD NOT
BECOME**

A generic interiors inspiration page, trend board, decorative template feed or loud luxury account.

MEMORY CUE

Radhika Mahajan Architects → Form × Space × Detail → Designing Spaces. Creating Experiences.

Positioning & brand promise

The social identity should communicate how RMA thinks about space.

DESIGNING SPACES. CREATING EXPERIENCES.

FORM × SPACE × DETAIL

Show the relationship between form, spatial planning, material expression and detail — and how those decisions shape the experience of the space.

CONTENT TEST

What was designed? Why was it designed this way?
What experience does the decision create?

Logo system

Use the approved logo family consistently. The social system should never redraw, distort or decorate the mark.

LOGO MARK

Primary monogram. Best for profile image and compact placements.

BRAND MARK

RM monogram + Radhika Mahajan Architects.

SUB MARK

Secondary compact signature where the full lock-up is too small.

NON-NEGOTIABLE

Never stretch, skew, recolour outside the approved palette, add effects, place over low-contrast imagery or crowd the clear space.

The RM monogram

A personal mark constructed with architectural logic.

RADHIKA MAHAJAN
ARCHITECTS

CONCEPT

The RM monogram combines the initials of Radhika Mahajan into a structured architectural symbol.

The construction logic references grids, plans, proportion, structural thinking and spatial relationships.

SOCIAL APPLICATION

Use the mark as a quiet signature.
Never let it compete with the work.

Approved colour palette

The approved palette is neutral, architectural and restrained.

COLOUR BEHAVIOUR

Mist White and Obsidian Black create the main contrast. Stone Grey controls secondary information. Architectural Beige adds warmth through restrained surfaces, cards and accents.

DO NOT ADD Olive • bright green • saturated orange • random pastels • unrelated gradients

Typography system

The supplied identity specifies three typefaces. Social templates should stay within this approved family.

VIDWI

Primary branded / display voice.

AGENCY

Supporting brand typeface.

MONTERRAT

Clean utility / information layer.

HIERARCHY RULE

ONE IDEA → ONE HEADLINE → ONE SUPPORTING THOUGHT

Variation should come from size, weight, spacing, alignment and image composition.

Graphic language

The social system borrows its logic from architecture: grids, proportion, lines and controlled negative space.

FINE RULES

Thin lines can divide content or reference drawing systems.

GRID

Aligned columns, consistent margins and repeated proportions.

TYPOGRAPHIC SCALE

Large type creates hierarchy; small type supports it.

ARCHITECTURAL CROP

Reveal material, proportion and spatial relationships.

SOFT CARDS

Mist White / Beige cards for material or educational content.

NEGATIVE SPACE

Allow breathing room around image and type.

Instagram feed architecture

The account should feel like one publication. Individual posts can vary, but the system must remain recognisable.

HERO PROJECT

High-quality project image; minimal copy; strongest spatial moment.

DESIGN THOUGHT

One clear architectural / interior idea with editorial typography.

MATERIAL / DETAIL

Close-up or material composition with concise annotation.

PROCESS

Sketch, plan, site, sample or behind-the-scenes decision.

SERVICE / STUDIO

Clear, structured information about what RMA does.

PEOPLE / PRACTICE

Founder or team moments used to humanise the studio.

Grid A | image-led editorial

Reference direction: image-led, rich, architectural and portfolio-focused.

RMA GRID A

Best for project launches, portfolio moments, strong photography and visual authority.

Grid A — production rules

Use this route when the feed needs to feel darker, richer and more portfolio-led.

DOMINANT FIELD	Obsidian Black + full-bleed architecture imagery.
TEXT	Mist White; Architectural Beige for selective emphasis.
IMAGE	Warm, atmospheric, high-quality photography.
GRAPHIC	Fine rules and restrained labels.
RHYTHM	Alternate hero image / statement / detail / image.
LOGO	Small and quiet; never compete with the project.

Grid B | structured architectural journal

A more open system for design principles, education, materials and process.

RMA GRID B

Best for design principles, educational posts, material stories and service communication.

Grid B — production rules

Use this route when the account needs more breathing room, explanation and editorial structure.

LIGHT FIELD

Mist White is the primary surface.

WARM ACCENT

Architectural Beige is the warm secondary surface.

DARK TYPE

Obsidian Black / Stone Grey for hierarchy.

LINE SYSTEM

Fine horizontal / vertical rules can structure the composition.

TEXT

Short statement + supporting explanation; avoid paragraphs.

IMAGE

One strong image should remain visually dominant.

Content architecture

The content system makes the visual identity useful for an ongoing account.

PROJECTS

Completed work, walkthroughs, before/after, hero spaces.

DESIGN THINKING

Why a spatial decision was made; form, planning, proportion.

MATERIAL + DETAIL

Material palettes, junctions, lighting, furniture and craft.

PROCESS

Sketches, drawings, site visits, iterations and selections.

PEOPLE + PRACTICE

Radhika, team, studio culture, collaboration and project moments.

EDUCATION

Simple architecture / interior insights that build authority.

Carousel system

Carousels should read like mini design stories. Each slide has one job.

01 / HOOK

A strong spatial statement, question or observation.

02 / CONTEXT

Introduce the project, problem or design situation.

03 / THINKING

Explain the design decision in simple language.

04 / DETAIL

Show the material, plan, element or spatial moment.

05 / TAKEAWAY

One clear design insight the viewer can remember.

06 / BRAND / CTA

Quiet RMA signature + relevant project action.

Reels + stories

Motion should feel like the moving version of the same architectural identity.

REELS	Slow pans, walkthroughs, material details, before/after, site progress.
TEXT	Short on-screen statements within the brand hierarchy.
TRANSITIONS	Simple cuts, match cuts, movement through space.
COVER	Treat the reel cover as a feed tile.
STORIES	Mist / Black / Beige frames, project details, Q&A and enquiry prompts.

Instagram profile system

The profile itself should be treated as the first page of the brand publication.

PROFILE IMAGE	Approved RM monogram / logo mark with strong contrast and clear space.
NAME	Radhika Mahajan Architects
BIO	Architecture + Interiors / Thoughtfully designed spaces / Form × Space × Detail / Enquiry
HIGHLIGHTS	PROJECTS • PROCESS • MATERIALS • ABOUT • STUDIO • SERVICES • CONTACT
PINNED 01	Who is Radhika Mahajan Architects? — practice introduction.
PINNED 02	Form × Space × Detail — design philosophy.
PINNED 03	Strongest project / case study / proof of work.

Do / don't

Use this as the final production check before anything goes live.

DO

- Use approved palette only.
- Keep architecture as hero.
- Maintain clear margins.
- Use one dominant idea.
- Use fine-line structure.
- Keep imagery warm + authentic.
- Build rhythm across the grid.
- Keep the logo quiet.

DON'T

- Add olive or unrelated colours.
- Stretch / skew the logo.
- Use random fonts.
- Overload tiles with copy.
- Use heavy gradients / effects.
- Use generic stock imagery.
- Make every post identical.
- Let graphics overpower the work.

Designer + SMM workflow

A shared process prevents inconsistency and reduces rework.

01 SMM BRIEF	Topic, pillar, objective, reference, copy and CTA.
02 GRID DECISION	Select Grid A or Grid B before design begins.
03 IMAGE SELECTION	Choose the strongest project / material / process image.
04 DESIGN	Apply palette, typography, spacing, image treatment and logo.
05 FEED CHECK	Review the post beside the previous 6–9 posts.
06 APPROVAL	Client review only after internal brand check.
07 PUBLISH	Final export + caption + scheduling + archive the master.

Quality check

A final 9/10 test for every post.

01Image quality

02Composition

03Typography

08Feed context

09Brand feel

THE FINAL QUESTION

Would someone recognise this as RMA without seeing the logo?

A clear visual system for every RMA social touchpoint.
